### ABOUT ME

Entry-level Data Scientist with proficiency in Python and Statistics, eager to make a meaningful impact through contribution. I'm passionate, energetic, and geeky individual whose desire to learn is endless.

### EDUCATION

#### B.E. in Artificial Intelligence & Data Science

2021-2025

PES Modern College of Engineering

CGPA: **9.09**

#### Senior Secondary (XII), Science

2020

Shree Ganesh Jr College, HSC Board

Grades: **83.38%**

#### Secondary (X)

2018

New English School Korhale, India

Grades: **89%**

### SKILLS

#### Primary Skills:

- **Programming Languages:** Python, R, C++, SQL
- **Python/ML/CV Packages:** Keras, OpenCV, Pandas, Scikit-Learn, Numpy, Matplotlib, Seaborn, Plotly
- **Knowledge of Machine Learning**
- **Deep Learning:** Neural Network, ANN, CNN, DNN, Transfer Learning, Back Propagation, TensorFlow
- Text understanding, representation & classification techniques, Text clustering
- **Libraries:** BOW, TFIDF, word2vec, doc2vec, sent2vec, keyphrase extraction
- LSTM RNN, Transformers
- Generative AI, Large Language Models, LangChain Framework
- Statistics, Linear Algebra, Probability
- DSA, Problem Solving

#### Secondary Skills:

- **WEB TECHNOLOGIES:** HTML, CSS, JavaScript, Django, Flask, Streamlit
- **DATABASES:** MySQL, MongoDB
- **Visualization Tools:** PowerBI, Microsoft Excel
- **Web Scraping:** Scrapy, BeautifulSoup, Selenium
- **Cloud Platform Services:** AWS

### EXPERIENCE

#### Data Science Intern

DataNnovite Solutions LLP

May 2024 - present  
*Pune, Maharashtra (Onsite)*

- Working on Data Science technologies including Machine Learning, Deep Learning, Large Language Models, Generative AI.
- Developed a solution for analyzing and processing clients' transaction and campaign data to feed into a RAG model, enabling the retrieval of answers to specific business questions via a dashboard.

## PROJECTS

---

### 1. Automated Business Insights and Campaign Optimization

- Developed a solution to analyze client transaction and campaign data using a RAG model, improving decision-making via a dashboard.
- Segmented customers using K-means clustering and predicted next purchases based on historical data.
- Targeted specific customer segments with personalized texts generated by an LLM for future campaigns.
- **Tech Stack:** Python | Pandas | Numpy | LLM | LangChain | Flask

### 2. D-predicto [click here](#)

- Developed an end-to-end application predicting **diabetes**, **heart disease**, and **Parkinson's disease** using **XGBoost** and **RandomForest** models.
- Integrated an NLP-driven chatbot into the website to improve user interaction and access to information.
- Included a feature for users to book appointments with doctors if needed.
- **Tech Stack:** Python | SK Learn | ML | Numpy | Pandas | NLP | Flask | GitHub

### 3. RetainIQ [click here](#)

- Developed a system for predicting employee churn using **RandomForest** and **XGBoost** models to analyze workforce data.
- Implemented features for model training, batch prediction, and single employee prediction to determine retention likelihood.
- Built using Flask for web-based interaction
- **Tech Stack:** Python | SK Learn | ML | Numpy | Pandas | NLP | Flask | GitHub

### 4. GestureFlow [click here](#)

- Innovatively utilized Computer Vision and Gesture Recognition to redefine presentation interaction by creating a dynamic, hands-free platform for slide navigation and annotation.
- **Tech Stack:** Python | OpenCV | cvzone | OS Module | Numpy | Hand Tracking Module

## CERTIFICATES

---

- Quatium Data Analytics
- Cognizant Artificial Intelligence
- Google Cloud Jam

## ACHIEVEMENTS

---

- Winners Of Prostart 2023 -Team Matrix First Rank In College
- Academic topper throughout the graduation
- Earned Golden Badge in Python On HackerRank
- Solved over 300+ problems across diverse platforms
